Project Summary Template

This document is intended to provide a summary understanding of the high-level vision of your project goals.

Company Name/ Team Name	Video Game Journal
Company Address	N/A (Student Project)
Company Website	N/A
Telephone	N/A
Company Contact/ Team member names	Thinh Phan Vy Nguyen Jon Adrian Alvaro Hyechan Yeo
Title	**Thinh Phan – Project Leader / DevOps & QA Lead** • Coordinates the project, manages GitHub repo & branching strategy. • Oversees CI/CD setup (GitHub Actions). • Leads **testing and quality assurance** (reviews, bug tracking, test cases). **Vy Nguyen – Frontend Developer / UI-UX Designer** • Designs and develops the user interface (web/mobile). • Implements game logging, reviews, and activity feed pages. • Ensures usability and accessibility. **Jon Adrian Alvaro – Backend Developer / API & Database Specialist** • Builds backend services and integrates external APIs (RAWG, IGDB). • Manages database design, authentication, and data consistency **Hyechan Yeo – Full-Stack Developer / Social Features Lead** • Implements core social features (follow system, activity feed, trending discovery). • Supports integration between frontend and backend for smooth user experience • Assists with testing, documentation, and feature refinement
Company Email/ Email address for all team members	Thinh Phan : Thinh.Phan@georgebrown.ca Vy Nguyen : Vy.Nguyen2@georegbrown.ca Jon Adrian Alvaro: JonAdrianLee.Alvaro@georgebrown.ca Hyechan Yeo: Hyechan.Yeo@georgebrown.ca
Telephone	
Project Title	Video Game Journal – A Social Video Game Rating & Discovery Platform
Project Description	**<u>About the company:</u>** We are a student development team that is passionate about gaming, social platforms, and creating interactive digital experiences. **<u>About the project:</u>** This project is a web/mobile application designed to let gamers track the video games they play, write reviews, and build a personal gaming journal. Users can discover new titles, see what's trending, and follow friends' activities. The app integrates with external APIs such as **RAWG** and **IGDB** to ensure accurate, up-to-date game information including cover art, release dates, and platforms.
Problem/ Opportunity Assessment *	*Please describe current state problem/opportunity that describes the nature and extent of the problem (factual, quantified, concise), or that outlines a chance for advancement or progress.*

	1.	Gamers lack a simple, centralized platform (like Letterboxd for films) to track games they've played, are playing, or want to play.
	2.	Existing review platforms (Metacritic, IGN) are too critic-driven and fail to highlight authentic community voices.
	3.	There is an opportunity to create a **community-driven, social tool** that enables discovery, logging, and discussion of video games in one place.
Desired Project Outcomes/ Requirements*	*Define how this project shall address a business need, e.g. the business problem or opportunity described above; describe what the beneficiary must be able to do / receive from the solution*	
	1.	Enable users to create accounts and maintain a personal "game log" (played, playing, want to play).
	2.	Provide the ability to rate games, write reviews, and view aggregate ratings.
	3.	Integrate with RAWG/IGDB APIs to fetch game metadata (title, description, platforms, release year, cover art).
	4.	Develop social features including activity feeds, trending discovery, and the ability to follow friends.
Key Deliverables to be produced by students*	*Define the boundaries of work that you expect to receive from the students effort (vs. internal effort)*	
	1.	A working **web/mobile application** with authentication and user profiles. Provide the ability to rate games, write reviews, and view aggregate ratings.
	2.	**API integration** with RAWG/IGDB for complete and reliable game data. Develop social features including activity feeds, trending discovery, and the ability to follow friends.
	3.	A functional **review and rating system** with CRUD operations.
	4.	**Search and filter functionality** for games (by title, genre, platform).
Desired Start Date	**Monday, September 15, 2025.**	
Desired End Date	**Friday, March 27, 2026.**	
Attachments	*List attachments that support project description*	
	1	Project Vision Document (GameBoxd)
	2	API documentation links (RAWG, IGDB)
