THINH PHAN

Scarborough, ON | (647) 865 - 5547 | 23tphan@gmail.com | https://www.linkedin.com/in/thinh-phan-8b35b6358

SUMMARY

Computer Programming & Analysis student in final semester at George Brown College with experience in system design, data analysis, and application development gained through capstone and academic projects. Skilled at analyzing business requirements, working in Agile teams, and supporting data-informed decision making. Seeking an Information & Information Technology internship to further develop technical and analytical skills while contributing to effective, accessible, and well-designed public services.

TECHNICAL AND PROFESSIONAL SKILLS

- **Programming & Scripting**
  HTML5, CSS3, JavaScript, C#, Java, Python
- **Frameworks & Technologies**
  ASP.NET MVC, React
- **Databases & Data**
  PostgreSQL, MySQL, MongoDB, SQL
- **Data & Analytics Tools**
  Python (Pandas, NumPy), Data Cleaning & Visualization
- **Tools & Platforms**
  Git, GitHub, Azure Cloud, Visual Studio Code, IntelliJ
- **Methods & Practices**
  Agile/Scrum, Business Analysis, UML, System Design, MVC Architecture, UI/UX Design, Accessibility Awareness, Security & Privacy Fundamentals

PROJECTS & ACADEMIC EXPERIENCE

Capstone Project - Social Video Game Journal & Discovery Platform
System Design, Agile Development, Data Integration

- Designed and developed a multi-user platform enabling users to log, review, and discover video games.
- Participated in user-focused feature planning and iterative development within an Agile team.
- Integrated external APIs to support accurate, up-to-date game data and structured user content.
- Contributed to system design decisions, data modeling, and collaborative version control workflows.

Smart Inventory Management System
ASP.NET MVC, PostgreSQL, Business Logic

- Developed a role-based inventory management system aligned with real-world business processes.
- Implemented secure authentication, authorization, and data validation.
- Enabled product tracking, order management, and searchable inventory with filtering and sorting.
- Applied MVC architecture and relational database design to support maintainability and scalability

Data Analytics & Visualization Project
Python, Pandas, SQL

- Analyzed datasets using Python to identify trends and insights supporting decision-making.
- Cleaned, transformed, and validated raw data for analysis and reporting.
- Created visual summaries to communicate findings to non-technical audiences.

EDUCATION

George Brown College — Toronto, ON
Ontario College Advanced Diploma
Computer Programming & Analysis
Expected Graduation: April 2026
